SUMMARY

Creative and focused technology professional with over 16 years of progressive experience across financial, healthcare, industrial, and material handling systems. Driven to provide excellence in each task and proven ability to thrive when confronted with challenges.

EXPERTISE

Active Directory
Windows Server
VMware vSphere
HTML
CSS
PHP
C++
Microsoft Exchange

EDUCATION

BS – Computer Science

Athens State University / Athens, AL; Major – Information Systems

AS – Applied Science

Virginia College / Huntsville, AL;
Major – Design Visualization

CERTIFICATIONS

ComTIA Cybersecurity Analyst+
CompTIA Security+
Certified Ethical Hacker
Apple Certified Support Professional
CompTIA Network+
CompTIA A+

WORK EXPERIENCE

Information Security Analyst

Designed Conveyor Systems / 2021 – Present

Deliver security systems analysis, support, and paths for improvement.

- Develop and execute security controls
- Establish defensive countermeasures to prevent internal or external attacks
- Maintain hardware, software, network firewalls, and encryption protocols
- Administer cyber security policies to control physical and virtual systems access
- Respond to cyber security breaches, identify intrusions, and block or remove unauthorized access
- Research and evaluate cyber security threats
- Perform root cause analysis
- Periodically evaluate, audit, and remediate security controls for computer systems and networks

Systems Administrator

Toray Composite Materials America, Inc. / 2018 – 2021

Fill multiple technology roles and resolve challenges across all tiers of difficulty.

- Create and configure application server virtual machines
- Manage Windows 2012R2 and 2016 Servers
- Establish automated application updating using PDQ
- Manage Cisco switches and restore backup configurations
- Configure interfaces for segmented VLAN access
- Create and modify firewall ACLs and ACEs
- Monitor firewall logs and enable traffic flow between networks
- Manage firewall MFA VPN
- Write script to find and replace required hosts file entries
- Support site archiving, spam, cloud backup, and web filter services
- Apply server security updates and application version upgrades
- Investigate file security events and approve or ban them as necessary
- Reverse engineer systems and policies when tribal knowledge and documentation is not present
